## Look Up in Your Garage

Did you know that garage organization has become the fastest growing segment in the multi-billion dollar home improvement industry? And what's the hottest garage-organizing product on the market? Overhead storage racks.

For those organizers who work with residential clients in need of more storage but who don't want the hassle of a major remodel, *OrganizIT!* offers the perfect solution: overhead storage racks!

Almost every homeowner has wasted space in the garage that is not being utilized.

Garage overhead storage racks take advantage of this wasted space to make it extremely valuable.

The racks are perfect to store holiday decorations, legal boxes, suitcases and bulky items that won't fit in cabinets. Made of high-quality industrial steel, the racks come in a variety of sizes to meet your client's needs. The largest units measure 8' x 4' and can hold upwards of 600 lbs of weight. They have a wire-grid deck to help locate items from below; add-on accessories are available to hang items from underneath; e.g., a ladder, folding tables, bikes and skis.

So the next time you have a client who is in need of more storage, just walk out into the garage, look up, and think "overhead storage racks!"
